

Create a video

1. Capture video or pictures, in digital format.
2. Convert to a file format that can be uploaded or edited.

Open Mp4Cam2AVI

Select the file to convert

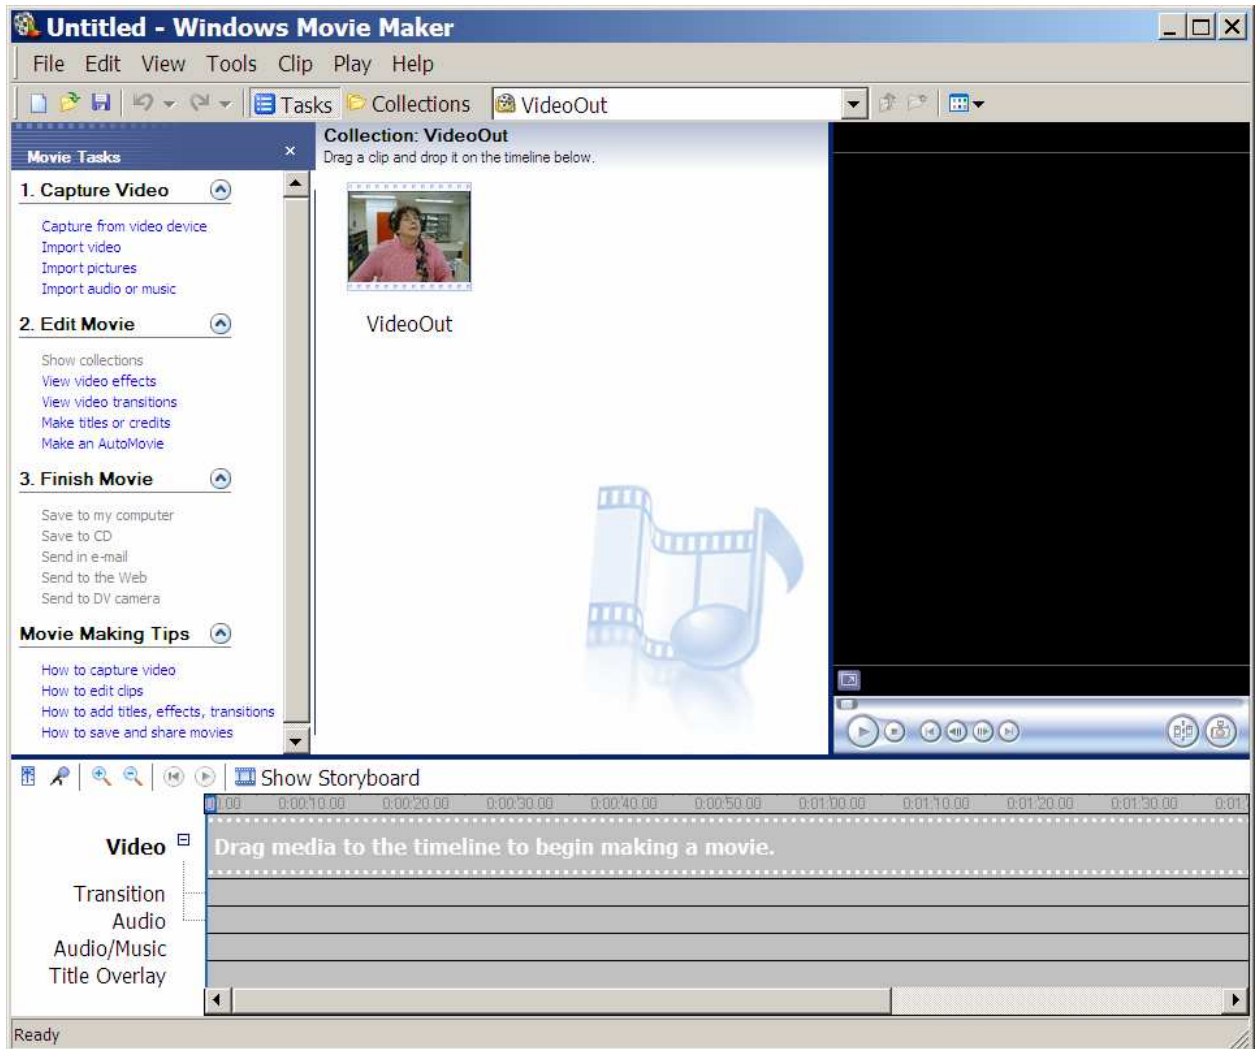

Then select start.

The video will be converted as Videoout.avi

3. Edit, if desired, then compress/render, in video editing software.

Open Windows Movie Maker

Select Import video, then select your video and select the Import button.

Select Save to my computer, change the name, then select the Next button,

Then after it converts, select the Finish.

4. Upload
